LinkedIn: linkedin.com/in/vaibhav-patil-49171a1a2

Full Stack Developer with nearly 3 years of experience specializing in the MEAN stack (MongoDB, Express, Angular, Node.js). Experienced in building responsive web applications, creating RESTful APIs, and managing databases. Strong background in frontend state management using RxJS and NgRx. Additionally experienced working with React and PHP, and continuously expanding backend skills with recent learning in Python, Java, and SQL. Focused on writing clean, maintainable code and working collaboratively in Agile teams.

Skills

- **Frontend:** Angular (14+), React, JavaScript (ES6+), TypeScript, HTML5, CSS3, Bootstrap.
- **State Management & Libraries:** RxJS, NgRx.
- **Backend:** Node.js, Express.js.
- **Databases:** MongoDB, PostgreSQL, SQL.
- **Tools & Practices:** Git, CI/CD, Agile/Scrum, Unit Testing (Jest), Docker.

Professional Experience

Software Engineer – SYN IT Solutions Private Limited, Pune | May 2023 – Present

Project: WOP m-ticket (Travel Booking Platform)

- Scalable Architecture: Architected and developed a full-stack ticket booking platform using Node.js and Express.js, implementing the CQRS pattern to separate command and query responsibilities for highly scalable backend performance.
- Database Optimization: Managed data storage using MongoDB and optimized performance by creating strategic indexes and utilizing complex Aggregation Pipelines, which reduced data loading times by roughly 25%.
- Advanced Frontend Engineering: Built responsive, pixel-perfect user interfaces using Angular within an Nx monorepo environment. Expertly managed complex data streams and state with RxJS and NgRx, improving user engagement by 30%.
- UI/UX & Localization: Worked closely with UX designers and product owners in an Agile setup to convert Figma designs into functional web pages, implementing i18n to deliver seamless multi-language support.
- Testing & CI/CD: Ensured robust code quality through comprehensive unit testing with Jest and regular code reviews. Actively managed Git version control and CI/CD pipelines to guarantee smooth, stable application deployments.

Project: Blancreme (E-commerce Platform)

- Cross-Stack Development: Developed dynamic, responsive frontend components using React to build a user-friendly e-commerce interface.
- API Integration: Managed complex data flows and seamless API integration between the React frontend and a PHP backend, utilizing SQL to efficiently query and manage the relational database.

Projects

Full-Stack E-commerce Platform:

- Built a full-stack e-commerce application using Angular and Node.js/Express, integrated with a MongoDB database to efficiently manage product catalogs and shopping cart data.
- GitHub: https://github.com/patilvaibhav45/angular-node-ecommerce-app

Personal Portfolio Website:

- Developed a fully responsive personal website with HTML, CSS, JavaScript.
- Live Website: https://patilvaibhav45.github.io/portfolio/

Education

Institute of Management & Research, Jalgaon

Integrated MCA (Master of Computer Applications) | CGPA: 8.50 | 2018 - 2023

- Strong academic focus on Computer Science, Mathematics, and logical problem-solving.
