LinkedIn: [linkedin.com/in/vaibhav-patil-49171a1a2](https://www.linkedin.com/in/vaibhav-patil-49171a1a2)

Full Stack Developer with 3 years of experience specialising in the MEAN stack (MongoDB, Express, Angular 18+, Node.js). Experienced in designing RESTful APIs from scratch, implementing JWT-based authentication, and building responsive frontends with Angular, RxJS, and NgRx. Hands-on with performance optimisation using Lighthouse. Led features end-to-end and handled production incidents. Focused on clean, maintainable code and collaborative Agile delivery.

Skills

-
- **Frontend:** Angular (18+), React, JavaScript (ES6+), TypeScript, HTML5, CSS3, Bootstrap.
 - **State Management & Libraries:** RxJS, NgRx.
 - **Backend:** Node.js, Express.js, REST API Design, JWT/OAuth Authentication.
 - **Databases:** MongoDB (Aggregation Pipelines, Indexing), SQL.
 - **Tools & Practices:** Git, CI/CD, Agile/Scrum, Unit Testing (Jest), Docker.

Professional Experience

Software Engineer – SYN IT Solutions Private Limited, Pune | May 2023 – Present

Project: WOP m-ticket (Travel Booking Platform)

- **API Design & Auth:** Designed and developed RESTful APIs from scratch using Node.js and Express.js, implementing JWT-based authentication to secure endpoints and manage user sessions.
- **Scalable Architecture:** Architected the backend using the CQRS pattern to separate command and query responsibilities, ensuring highly scalable performance under peak travel booking loads.
- **Database Optimisation:** Managed data storage in MongoDB and reduced data loading times by ~25% through strategic indexing and complex Aggregation Pipelines.
- **Frontend Engineering:** Built responsive, pixel-perfect UIs using Angular 18+ within an Nx monorepo. Improved page load performance by implementing lazy loading and code splitting, validated with Lighthouse and Core Web Vitals audits.
- **State Management:** Managed complex data streams and application state using RxJS and NgRx, reducing unnecessary re-renders and improving UI responsiveness.
- **UI/UX & Localisation:** Converted Figma designs into functional web pages in close collaboration with UX designers and product owners, and implemented i18n for seamless multi-language support.
- **Testing & CI/CD:** Wrote comprehensive unit tests using Jest and managed Git version control and CI/CD pipelines with Docker to ensure stable, consistent deployments.

Project: Blancreme (E-commerce Platform)

- **Cross-Stack Development:** Built dynamic, responsive frontend components using React for a user-facing e-commerce interface with a focus on performance and usability.
- **API Integration:** Managed data flow between the React frontend and a PHP backend, using SQL to efficiently query and manage relational product and order data.

Projects

Full-Stack E-commerce Platform:

- Built a full-stack e-commerce application using Angular and Node.js/Express, integrated with a MongoDB database to efficiently manage product catalogs and shopping cart data.
- GitHub: <https://github.com/patilvaibhav45/angular-node-ecommerce-app>

Personal Portfolio Website:

- Developed a fully responsive personal website with HTML, CSS, JavaScript.
- Live Website: <https://patilvaibhav45.github.io/portfolio/>

Education

Institute of Management & Research, Jalgaon

Integrated MCA (Master of Computer Applications) | CGPA: 8.50 | 2018 - 2023

- Strong academic focus on Computer Science, Mathematics, and logical problem-solving.
