

VAIBHAV PATIL

Pune, India | vaibhavrpp45@gmail.com | +91-9172455324 | linkedin.com/in/vaibhav-patil-49171a1a2

PROFESSIONAL SUMMARY

Full Stack Developer with 3+ years of experience building scalable full-stack applications using modern front-end frameworks (Angular, React) and Node.js-based back-end services. Skilled in designing and developing REST APIs, integrating databases (MongoDB, SQL) and external APIs, and applying microservices-oriented architecture patterns such as CQRS to support scalability and performance. Experienced with Git-based version control, CI/CD pipelines, and Docker as part of DevOps workflows, alongside JWT/OAuth-based security implementation. Proficient in TypeScript, JavaScript (ES6+), RxJS, and NgRx, with a strong record of delivering secure, scalable, and high-performing production applications within Agile/Scrum teams. Currently expanding skill set into Java (Spring Boot).

TECHNICAL SKILLS

Front End: Angular (14-18+), React, Angular Forms, Angular Material.

Back End: Node.js, Express.js, REST/GraphQL API Design, Microservices-Oriented Architecture, JWT Authentication.

Languages & Web Standards: TypeScript, JavaScript (ES6+), HTML5, CSS3, SCSS, Bootstrap, Responsive Web Design, Cross-Browser Compatibility.

Databases (SQL/NoSQL): MongoDB (Aggregation Pipelines, Indexing), SQL (Relational Data Management).

State Management: RxJS (Observables, Operators, Subjects), NgRx (Store, Effects, Selectors).

DevOps & Tools: Git, GitHub, CI/CD Pipelines, Docker, Nx Monorepo, Agile/Scrum, Unit Testing (Jest), Lighthouse, Core Web Vitals, i18n.

Upskilling In: Java(Spring Boot).

PROFESSIONAL EXPERIENCE

SYN IT Solutions Pvt. Ltd. — Software Engineer

Pune, India

Project: WOP m-ticket Travel Booking Platform

May 2023 – Present

- Developed scalable full-stack applications, building front-end interfaces with Angular 18+ and back-end API services with Node.js and Express.js, within an Nx monorepo architecture.
- Architected the back end using the CQRS pattern, applying microservices-oriented design principles to separate command and query responsibilities and support scalable performance during peak load.
- Designed and built RESTful APIs from scratch using Node.js and Express.js, with JWT-based authentication to secure endpoints and manage user sessions.
- Integrated MongoDB (NoSQL) databases with optimised Aggregation Pipelines and strategic indexing, reducing data loading times by approximately 25%; also integrated external APIs to extend platform functionality.
- Delivered pixel-perfect, responsive Angular UIs from Figma specifications in close collaboration with UX designers and product owners, ensuring cross-browser compatibility and performance.
- Managed complex application state and asynchronous data streams using RxJS operators and NgRx (Store, Effects, Selectors), reducing unnecessary re-renders and improving UI responsiveness.
- Implemented lazy loading, route-level code splitting, and OnPush change detection strategies to improve performance, validated through Lighthouse and Core Web Vitals audits.
- Contributed to DevOps pipelines by managing Git-based version control workflows and maintaining CI/CD pipelines via Docker for consistent, reliable deployments.
- Implemented Angular i18n (internationalisation) for multi-language support, expanding the platform's reach across multiple regions.
- Wrote comprehensive unit tests using Jest and participated in code reviews within Agile/Scrum sprints, contributing to security, scalability, and performance best practices.

Project: Blancreme E-commerce Platform

June 2024 – May 2025

- Built dynamic, responsive front end components using React.js for a user-facing e-commerce interface, applying modern frontend framework practices for performance and usability across devices.
- Managed data flow between the React front end and a PHP backend, integrating with a SQL database to query and manage relational product and order data efficiently.
- Collaborated with stakeholders to gather and analyse requirements, translating business needs into functional, production-ready application features.

PROJECTS

Full-Stack E-commerce Application

- Built a full-stack e-commerce application using Angular (front end) and Node.js/Express.js REST APIs (back end), integrated with MongoDB (NoSQL) to manage product catalogues and shopping cart data.
- **GitHub:** github.com/patilvaibhav45/angular-node-ecommerce-app

Personal Portfolio Website

- Developed a fully responsive personal portfolio website using HTML5, CSS3, and JavaScript, demonstrating proficiency in responsive web design.
- **Live:** patilvaibhav45.github.io/portfolio

EDUCATION

Integrated MCA — Master of Computer Applications

2018 – 2023

Institute of Management & Research, Jalgaon | CGPA: 8.50 | 15 years full-time education (10 + 2 + Integrated 5-year MCA)
